Ex-President Harrison Sinks Into Unconscious-
ness and the End is Momentarily Ex-
pected by the Loving Watchers
at His Bedside.

Indianapolis, March 13.—At eight o'clock this morning ex-President Harrison was in a comatose condition, but appeared to recognize his wife. There is absolutely no hope. Russell Harrison is on his way to his father's bedside, but Mrs. McKee Harrison, the daughter has sent word that on ac-

EX-PRESIDENT HARRISON.
Count of illness in her own family, she will not go to her father, but will remain at home in Saratoga.
Dr. Jameson in his 11 o'clock bulletin says that there has been no change in Harrison's condition since early this morning, except that he is gradually growing weaker. His physicians are using every effort to keep him alive until the arrival of R. B. Harrison at noon.
This afternoon the information was given out that Mr. Harrison was

aroused at times with great difficulty, but he gives no signs that he recognizes his friends. The oxygen treatment continues to be given regular. The strain is telling severely on Mrs. Harrison.

The last bulletin from Mr. Harrison's bedside was issued at 1:30 o'clock and indications that he may live some hours but is slowly sinking.

A WEEK AGO

General Harrison Was Able to be at
His Law Office.

Indianapolis, March 13.—General Harrison is now lying in an unconscious condition. He is constantly growing weaker and the congestion continues to spread. There is nothing to indicate that his death will occur for several hours at least.

General Harrison was in perfect health last Wednesday. He went down town to a law office, where he remained for about an hour and a half, talking to several friends. Thursday morning he awakened with a pain in his chest. Mrs. Harrison became alarmed and the family physician, Dr. Henry Jameson, was summoned. He pronounced it simply a cold. Then the lungs became rapidly affected and the illness was complicated with intercostal neuralgia. Saturday his condition was serious. Sunday, for the first time, the physicians began to have fears for the recovery of the patient. The next day it was announced that the illness was alarming, and that there was danger that the general would never recover from the attack. Since Monday morning his condition has gradually grown worse.

CIRCLE OF BLOOD

Around the Child-Wife's New Home
Drove Farm Animals Mad.

Findlay, Ohio, March 13.—John Kissack, a farmer aged sixty, married the village belle of New Stark, Mary Ross, aged sixteen and took her to his home, twelve miles from here. The disappointed lovers of the young girl got fresh blood from a slaughter house and made a circle around Kissack's house in the snow and then let all of the animals of the place loose. The animals smelled the fresh blood and immediately went crazy. The crowd

also let the animals on a near by farm loose and soon they were all roaring and pawing up Kissack's yard till it was a quagmire. Their howling could be heard for miles. The farmers turned out to find what the trouble was but only laughed when they saw what it was. Kissack and his young wife were nearly scared to death. They were kept in this state of siege till broad daylight, when the animals disappeared.

A Distressing Affair.

Bluffton, Ind., March 13.—A girl four years old caused a gas explosion here that wrecked a house and cost the life of the child and that of its 2-year-old sister and the fatal injuring of her mother, Mrs. William Huffman, the wife of a clerk. The elder girl pulled the gas connection from the stove and the gas filled the room, igniting from the heat of the stove, which caused an explosion. Mrs. Huffman rushed into the blazing room, where she grabbed the younger child, losing her hair, and was burned herself so severely that there are no hopes for her recovery. The child died shortly after. The house was totally destroyed. When the explosion occurred the elder girl crawled beneath the bookcase. Only her skull was found among the ashes.

Carrie Creates a Scene.

Topeka, March 13.—Mrs. Nation, accompanied by Mrs. White and Mrs. Frost, visited the Topeka club, a fashionable organization, and created a scene before she was ejected. Six of the club members were enjoying a social game of whist when three women came into the room. "I'm Carrie Nation," said the sloop smasher, and she made a lunge toward some wine on the tables, carrying forward her attack with such energy that there was a lively scuffle between the three crusaders and the six club members before the women could be hustled out of the building.

With Volunteers.

San Francisco, March 13.—The

transport Hancock has arrived from Manila with the Thirtieth United States volunteer infantry. There were in all 875 people on board, of which number 28 are army officers, 738 non-commissioned officers and men of the Thirtieth volunteers. The regiment is composed of men from the states of Michigan, Illinois and Indiana, the Michigan men predominating. The Hancock also brought 72 prisoners and discharged soldiers who were deported on a military order.

Tribesmen Defeated.

Algiers, March 13.—A dispatch has been received here from General Service announcing that another engagement has been fought between the French punitive expedition, consisting of French and Algerian troops, and the Moroccan berabers, in the district of Timimoun, oasis of Toast, in which the tribesmen were dispersed with great loss. The French expedition lost two French officers and 23 men, including four Frenchmen killed, and had many others wounded.

A Howling Blizzard.

St. Paul, March 13.—Special dispatches report a blizzard raging throughout a portion of the Dakotas, Minnesota and Wisconsin. At Cumberland, Wis., the worst blizzard in years is raging. Royaltown, Minn., reports that six inches of snow have fallen and it is still snowing. At Rice Lake, Wis., 13 inches of snow fell. Sauk Center, Minn., says that a hard storm has been raging there and that much stock will be lost.

Trial of the Illinois.
Newport News, March 13.—On her builders' trial trip the battleship Illinois more than measured up to expectations. The ship was not taken out to deep sea, but was given a run down the coast, the main object being to test her boilers. On the return, under a moderate forced draught, the ship's indicator showed her speed in a two-hours' run to average 16.2 knots an hour with 107 revolutions. The contract requirements call for 16 knots an hour with 120 revolutions.

Prisoner Recaptured.
Manilla, Ia., March 13.—John Stovel, under indictment for the Manila express robbery, who escaped from the Denison jail Saturday evening, was recaptured near here by Sheriff Bell. It is said there is reason to believe confederates have already taken the stolen money from its hiding place, and that there are others besides those now under indictment implicated in the affair.

Railroad Taxes in Kentucky.
Frankfort, Ky., March 13.—The state board of valuation refused a rehearing to the railroads which sought to induce the board to revise its ruling subjecting their corporate franchises to county and city taxation. The ruling subjects them to several hundred thousand dollars additional taxes annually and affects all roads running into the state.

VIEW
Of Cuban Affairs
by Gomez.

Sent a Letter

To a Friend of His in
San Domingo,

In Which He Declares That
the Present Aspect is
Serious.

Says That the Sentiment of the
Cubans Has Been Wounded—
General Wood Advises the
Convention.

Havana, March 13.—La Lucha publishes part of a letter which General Maximo Gomez recently wrote to a friend in San Domingo. Speaking of the present situation in Cuba, General Gomez said:

"Matters here have a serious aspect. This change in the people, who had begun to feel content with the Americans, is due to the Platt amendment. The ill-advised proceeding has wounded the sentiment of Cubans, who feel the mild disgust which such unreasonable behavior always produces. People wonder how the United States, which are the exponents of liberty, can deny our right to defend the principle of liberty. Was our fight the result of hatred of Spain or of love of liberty? The United States are too rich a neighbor to ask of Cuba these crumbly concessions. The Americans should know that, as a star of greater magnitude, the United States will exercise a proportional influence on all of the nations of the great family of American republics."

In order to remove all doubts from the minds of the members of the constitutional convention as to the power of the convention to draw up a scheme of relations that would bind the future republic, General Wood sent a communication to the convention, pointing out that the warrant calling the elections gave the delegates this power.

Conditions in Cuba.
Washington, March 13.—Conditions in Cuba are said by officials at the war department to be improving. It is asserted that the feeling of unrest which followed the adoption of the Platt Cuban proposition by congress is quieting down and gradually a peaceful condition is being brought about. Confidence is expressed that this state of affairs in Cuba will continue unless something now unforeseen should develop.

Schley Ordered Home.
Washington, March 13.—Orders were issued at the navy department detaching Rear Admiral W. S. Schley from the command of the South Atlantic station and ordering him home for further orders, and detaching Rear Admiral B. J. Cromwell from command of the Portsmouth navy yard, April 1, and ordering him to command of the South Atlantic station, sailing from New York, April 3.

Kruger Ignores Them.
Brussels, March 13.—Dr. Leyds announces that Mr. Kruger will ignore the surrender negotiations between General Botha and Lord Kitchener.

PLEA
In Behalf of the
Filipinos
Made by Lopez
In New Century Hall in
Philadelphia.
Asks America to Grant His
People Absolute Inde-
pendence,
And Declares That Fear of Anarchy
and Disunity Can be Proved
Groundless. Waits
Wrongs Righted.

Philadelphia, March 13.—Senator Six to Lopez, a native Filipino, addressed a large meeting of the citizens of Philadelphia at the New Century hall, he having accepted an invitation "to explain the desires of his countrymen." He was well received and said in part: "My mission in this country is not only to tell the truth about the Philippines, but to obtain peace. The way out of the present difficulty may be summed up in one phrase: Do unto us as you desired that George III should do unto you. Admit that the Filipinos have the same rights which you yourselves enjoy. If wrong has been done, admit that also and rectify it. It is nobler to admit a wrong than to persist in it. Had congress declared intentions with regard to the Philippines, conformable with Philippine independence, the clash of arms would have been heard no more, and strife would have ceased between two peoples who ought never to have been other than friends."

"Let the Filipinos re-establish the government they have instituted with the consent of the governed; take whatever means are necessary to protect your interests and to discharge your international obligations. You will then be surprised, though perhaps it will not be a surprise to some, to find that all your fears about anarchy and disunity and failure will have proved to be groundless. Another example will have been given to kings, showing that the people may be trusted to govern themselves, and we shall be able to look up to 'Old Glory,' knowing that it is the symbol of liberty—liberty not only to this people, but to all mankind."

Ice Plant at Manila.
Manilla, March 13.—The authorities at Washington have assigned the control of the great ice plant, the construction of which has been hindered for various reasons for the last two years, to the insular government. In order to save cold storage capacity the army will be furnished with ice under contract with the insular government. Employees will be furnished with ice at approximately cost prices. The cost of the construction of this ice plant was estimated at \$400,000, but the commission found it necessary to appropriate \$200,000 more.

Botha Awaits Dewet.
London, March 13.—There is no further news regarding the peace negotiations at Pretoria except a report that General Botha is waiting for the return of General Dewet to the north before coming to a decision. According to a Bloemfontein correspondent there are as many as eight separate guerilla commandoes in Orange River Colony.

A Suspect Held.
Mt. Vernon, O., March 13.—George W. Houck, the barber at Bladensburg, was placed under arrest by Sheriff Lynde on suspicion of having killed Mrs. Sarah Jane Hess, his neighbor, who was found murdered at that village. Bloodhounds followed a trail to the back door of Houck's home. Houck asserts his innocence.

Husband Accused.
Keytesville, Mo., March 13.—The coroner's jury in the case of Mrs. Horace Williams, who was killed at a station near here last Thursday, brought in a verdict charging her husband with the crime. Williams is still at large. A mob has traced him to Miami, Mo., where he is supposed to have taken a boat and started down the river.

Treasury Statement.
Washington, March 13.—Statement of treasury balances in general fund, exclusive of the \$150,000,000 gold reserve in the division of redemption: Available cash balance, \$149,498,152; gold, \$38,329,555.

Ohio Falling.
Pittsburg, March 13.—The Ohio river has receded to 17 feet and is still falling. From all up river points on both the Allegheny and Monongahela come reports of falling water, and all danger of flood passed.

Callahan's Trial.
Omaha, March 13.—The attorneys of James Callahan, who was arraigned in the district court for alleged connection with the kidnaping of Edward Cudahy, Jr., obtained a postponement of trial to March 20. Callahan plead not guilty.

One For Sweeney.
Memphis, March 13.—Patsy Sweeney of Ireland administered a severe drubbing to Sam Phillips of Buffalo for seven rounds before the Phoenix Athletic club, and was given the decision because Phillips repeatedly took the count without a blow landing.

Chinese Intercepted.
Malone, N. Y., March 13.—The Malone officials captured 48 Chinese on the border north of Malone. They will probably be sent to Ogdensburg. It is said 26 more are coming.

Launching of the Ohio.
San Francisco, March 13.—The legislature appointed a joint committee to welcome President McKinley on his visit to California to attend the launching of the battleship Ohio next May.

Turf Winners.
At Oakland—Beretta, Medway, Dr. Schurff, Frank Bell, Norfolk, The Buffon. At Tanforan—Santa Lucia, Rory Ough, Eva Mae, Hayland, Isabelle, Selde. At New Orleans—Helen Paxton, Rosy Morn, Fillbuster, Dissolute, Leon Ferguson, Cogswell.

BOER
Leaders Gained a
Point.

British Policy

Is Said to Have Been
Modified.

Lord Kitchener Authorized to
Grant Amnesty to the
Fighters.

Loans Will be Granted Boers to Aid
Them in Re-building and Re-
stocking Their War De-
vastated Farms.

London, March 13.—The Daily News makes the following important statement: "We understand that the government has greatly modified the unconditional surrender policy. We believe Lord Kitchener has been authorized to offer amnesty to both the Boers and the Boer leaders, except where treachery is clearly proved. Cape rebels only are to be punished by disfranchisement. Loans are to be granted to the Boers for rebuilding and restocking their farms, and, finally, the government will offer to establish some kind of civil government as soon as the commandoes have surrendered. Its form will probably be that of a crown colony."

After Foreign Consuls.
Washington, March 13.—No further information has been received at the war department concerning the organization in Manila, which includes several foreign consuls and which has been engaged in supplying the insurgents munitions of war. The organization practically is broken up, but it is said at the department that some of the persons engaged will be punished so as to give others to understand that such conspiracies are not to be permitted by United States authorities.

Recruits in Plenty.
Washington, March 13.—An increase of over 100 per cent in the number of enlistments for the regular army since the work of recruiting was begun Feb. 8, just after the passage of the army reorganization bill, has encouraged the war department officials. They now feel confident that there will be no trouble about finding all the men necessary to bring the army up to its full proportions before the date arrives when the volunteers must be mustered out.

Found Not Guilty.
Springfield, Ill., March 13.—The jury in the case of Elmer Clark, a farmer living near Petersburg, charged with murdering Harry Ball, formerly an employee of Clarke, returned a verdict of not guilty. The defense was that Clark was temporarily insane when he committed the deed. The testimony in the case showed that Ball had seduced Clark's wife and their eldest daughter, Minnie Clark.

Diaz Invited.
San Francisco, March 13.—A formal invitation was sent President Diaz of Mexico by the reception committee which has in charge the entertainment of President McKinley during his proposed visit, inviting President Diaz to visit this city at the same time President McKinley does.

HEAVY

Fighting is Renewed Between Foreign
and Chinese Troops.

The Retaking of Manchuria

Is Believed to be the Plan Behind the Aggres-
sive Activity of the Chinese. Two
Hundred and Fifty Dead Left
West of Suling Pass.

Berlin, March 13.—The war office has received the following dispatch from Count Von Waldersee at Peking: "In the light west of Suling Pass we had only one slightly wounded. The Chinese left 250 dead on the field. Our cavalry, with four quick-firers, pursued the Chinese 20 miles. A battalion remains at Pen Ping and westward from the great wall in order to prevent a return of the Chinese troops."

Official circles in Berlin declare it is impossible to judge here exactly what leads to the Chinese activity around the great wall. The Russian papers are spreading reports that the movement there is engineered by General Tung Fu Hsiang and Prince Tuan for the reconquest of Manchuria. It is believed in Berlin that the Chinese troops near the great wall have but slight power of resistance.

Story of the Battle.
Peking, March 13.—The Germans captured the Chung-Shun pass, between the province of Chi Li and Shan Si, after several hours' fighting. This result was brilliantly achieved by the Bavarian battalion, which marched 125 miles from Pao Ting Fu in four days, through mountains and over difficult mule tracks. The Chinese held an apparently impregnable position on the great wall, at the highest part of the pass. They had several thousand troops and artillery of all descriptions.

Views of Gage.
He Sees No Danger of a Tariff War.
The Russian Case.

Chicago, March 13.—In answer to a question concerning his recent order placing a countervailing duty on Russian sugar, Secretary of the Treasury Gage said, with emphasis: "I see no danger of a tariff war. Who is going to start one? So far as Germany and other countries are concerned, we make our laws and they make theirs. Germany can ship goods here subject to our regulations or keep them at home, and so can we. The laws are made by the people and it is the duty of the executive officers to enforce them as they find them. The Russian sugar case will probably go to the board of general appraisers, where it belongs."

Work of the House.
Washington, March 13.—F. H. Wakefield, tally clerk of the house of representatives, has prepared a detailed statement of the work of that body during the two sessions of the Fifty-sixth congress. The house passed during the two sessions 1,112 house bills and 739 senate bills and resolutions. It left upon its calendar, unacted on, 538 house bills and resolutions and 89 senate bills and resolutions. In the Fifty-fifth congress the house passed 1,473 bills and resolutions, while 641 reported from committees remained undisposed of.

China to Hold Off.

Peking, March 13.—It is believed that the Chinese court has decided not to authorize the signature of the Manchurian convention until it is seen how far powers will support China's refusal to sign. So far as the assurances of Count Lamsdorf are concerned, nothing of this kind will have any decisive weight until Russia renounces her policy of secret negotiations with China and discloses the terms of the secret engagements she has undoubtedly imposed on China in recent years.

A Rap at Monroe Doctrine.

London, March 13.—The Standard says: "Now that the American republic is taking an active interest in the world's politics, the time has come when the fiction that the western hemisphere is to be guarded as a close preserve for American enterprises should finally be exploded. English interests are quite as paramount as those of the sister states, and it can not be long before the attention of the continental powers will be more directly drawn to the commercial possibilities of the dormant southern half of the continent."

Will Botha Surrender?
London, March 13.—Inquiries made at the war office show the officials there have no recent news of the surrender negotiations. They think the armistice expires March 14, and are inclined to believe General Botha will

The Germans attacked them with 600 infantry and two howitzers. The turning movement, over an almost impassable country, occupied seven hours, and was completely successful, and was completely successful."

British Versus Russians.
London, March 13.—Friction has arisen at Tien Tsin between the British and the Russians over a piece of land alleged to belong to the railway company and to have been in possession of the company for some years. According to dispatches from Tien Tsin the Russians assert that this land is part of their new possession, and therefore Russian property. Mr. Kinder, manager of the railway, had begun to make a siding, but was stopped by the Russian authorities. Guards were put on the line by the British and the work continued.

Immediate Action Necessary.
Washington, March 13.—Nothing has been heard from Russia since the verbal communication made by Count Cassini last week setting forth the rectitude of Russia's objects in China generally and in Manchuria in particular. Minister Wu has been almost a daily caller at the state department, and it is evident that the Chinese are impressed by the belief that the crisis has been reached, and that the destiny of Manchuria depends upon the immediate action of the powers.

Arson Charged.

Findlay, O., March 13.—Philip Smith's barn and contents including a valuable horse, were destroyed by an incendiary fire. Trying to save the horse Mr. Smith was seriously and perhaps fatally burned. He has made affidavit for arson against Samuel Cowles and son.

Jessie Morrison In Jail.

Eldorado, Kan., March 13.—Jessie Morrison, whose first trial last fall for the murder of Mrs. Olin Cassie resulted in no verdict, was committed to jail in default of \$50,000 bail to await a second trial at the June term of court.

Big Strike Threatened.

St. Joseph, Mo., March 13.—A general strike is threatened of several thousand garment workers employed at the furnishing factories here. A meeting was held by 500 girls employed at the J. S. Brittain Dry Goods company's factory, who struck Tuesday, and they decided to stand firm on their demand for a restoration of wages to a scale in vogue before the factory went into the hands of a new manager a few weeks ago. Support has been promised by all the labor unions of the city.

Bridge Employees Strike.

New York, March 13.—A strike was ordered among the employees of the new East River bridge. The strike was begun by the painters and grew out of the discharge of John Hale, one of the painters, who was on the scaffold, the rope fastenings of which broke on Friday, causing the death of Frank Aberton. Hale, in saving himself, fractured his left arm and dropped a pot of black paint, which in falling struck the granite anchorage, causing a disfigurement of the surface. For this, it is claimed, he was discharged.

Damaged by a Cave-In.

Scranton, Pa., March 13.—A serious cave-in of the Spencer mine workings occurred at Dunmore, causing a surface disturbance over 700 feet long and 100 feet in width. Four residences were so badly wrecked as to render them uninhabitable. The mine workings were wrenched and twisted so badly that no work can be done for several days.

REMARKABLE CURES OF RHEUMATISM.

From the Vindicator, Rutherfordton, N. C.

The editor of the Vindicator has had occasion to test the efficacy of Chamberlain's Pain Balm twice with the most remarkable results in each case. First, with rheumatism in the shoulder from which he suffered excruciating pain for ten days, which was relieved with two applications of Pain Balm, rubbing the parts afflicted and realizing instant benefit and entire relief in a very short time. Second, in rheumatism in thigh joint, almost prostrating him with severe pain, which was relieved by two applications, rubbing with the liniment on retiring at night, and getting up free from pain. For sale by H. F. Vorkamp, cor. Main and North streets.

Greatest of Fleamasters.

During the year just closed, Mrs. John Walters of Point Township, Pa., has made \$3,000 plus, and her husband records the fact with evident pride. Mr. Walters, the story goes, was a lover of pie before he met his wife-to-be. Mrs. Walters tells, nowadays, that one of the stipulations of the marriage contract was that she should have pies on the table every day till death did part her and her husband. The youthful bride, at the start, baked many pies, such as Mr. Walters' mother never made. But she improved. Years of training fitted her for the proud record, 3,303 pies, announced for the year just closed. Farmer Walters came down the day the eight thousand three hundred and third pie was baked to spread the news. He is a tall, lanky fellow, with the appearance of a champion pie eater. One of his seven lanky sons, each of whom inherits his love for crisp pastry, accompanied him to bear witness to the truth of his story.

New Cereals Pay.

A returned sojourner in Corea tells that he asked a native priest: "Tell me why you people kneel down before a stone, or piece of wood, or any inanimate object, and pray to it? Why not pray to God, as Christians do?" "I will explain," said the devout idolater. "Christians close their eyes and look up without seeing anything, as they pray. The Coreans do not pray to the piece of stone or wood, as you imagine, but to the same good God, and select the inanimate object merely as an emblem. Instead of seeing nothing, they gaze upon God's handiwork, for God made the stone."

AGRICULTURE

Alfalfa and Clover.

There has been so much said and written about alfalfa that it has become popular outside of the regions in which conditions are suitable for its growth. This has led to a good many farmers experimenting with it in states where red clover grows abundantly and where there is no pressing need for the growing of alfalfa. Whenever asked about the matter the advice of the Farmer's Review has been for the farmers to be satisfied with red clover in the states in which it can be grown successfully.

For Illinois, Wisconsin, Indiana, Michigan and the neighboring states there is no necessity for the growing of alfalfa and in most parts of the plant would most likely prove a failure if tried. There are, a good many reasons why we should stick to red clover. The first reason is that it can enter into the rotation with the other crops. Its rooting is not so deep that it cannot be disturbed, and it does not take years to get it well rooted.

With alfalfa the case is different. It is regarded as a permanent crop and grows better after having been permitted to take a few years in establishing its root system. The great difficulty in getting a catch of alfalfa is during the years when its roots are small and its growth comparatively feeble. But after it has reached down into the regions of eternal moisture, 10, 15 or 20 feet below the surface, it will grow on forever. It is said that in Ohio there are fields of alfalfa that have not been disturbed for 200 years and yet annually yield good crops. This will readily show how little it is fitted for the rotation.

Without the abundant sunshine to which it is accustomed it is difficult to cure alfalfa, and this is a very serious matter in a country of clouds and frequent rains. We note another thing in regard to alfalfa grown out of its natural habitat. It is smaller and does not yield the heavy crop that is credited to it. The writer has in mind in particular a crop that was grown a few years ago at the Michigan Experiment station. We doubt if in that case, under the best of conditions, the crop was as large as would have been realized from red clover.

Arsenic in Artificial Manures. We republish from "Lancet," of England, the following interesting bit of information:

During the past week our Laboratory Commissioners have undertaken the examination of a number of substances, including certain foods and drugs in common daily use, in the preparation of which sulphuric acid is used. It will be found, after a few moments' consideration, that a fairly lengthy list of articles of everyday use may thus be drawn upon. The results are not yet ripe for publication, but we feel bound to divulge one important result since the disturbing announcement has this week been made by the analyst of Manchester that arsenic has been found in malt in a quantity equal to that found in glucose or malt substitutes. Moreover, arsenic was found in beers which were known to be brewed from malt and hops only. Now that this remarkable statement has been made, we may say that we have found, in the course of the inquiry alluded to, artificial manures to be rich in arsenic easily soluble in water. This is hardly surprising, since the basis of artificial manures—namely, superphosphate of lime—is made by acting on ordinary bone ash with common oil of vitriol. The important point is that it has been established that plants to which arsenical manure is applied take up arsenic in their tissues. Cabbages and turnips gathered from fields manured with superphosphate have given unmistakable evidence of the presence of arsenic. It is probable that arsenic accumulates in the soil which is constantly being dressed with superphosphate, so that plants raised on such soil would absorb arsenic, and exercise an injurious effect on the health of man and animals. The question arises, therefore, may not the arsenic in fact be traceable to the somewhat large amount of arsenic inevitably present in artificial manures? This aspect of the subject is very serious, and needs further inquiry. We shall return to it in a future issue, when we hope also to be able to record the results obtained in an examination of other more or less familiar articles, in which arsenic may possibly be introduced through the employment of impure sulphuric acid in the course of manufacture.

"After suffering for two months from a severe attack of grip I found quick relief and a lasting cure by using Dr. Miles' Nervine, Pain Pills and Heart Cure."—Harry Abbott, Cincinnati, O.

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system. Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison, and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which made life most miserable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine that will effect a permanent cure of Catarrh."

is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

QUEER DRAFT ANIMALS.

Even the Pig Sometimes Used to Draw Vehicles.

When Lord Curzon, the viceroy of India, went to visit one of the native princes recently he was surprised to see in the gorgeous procession which met him two rhinoceroses ridden by postillions. A team almost as strange as that of the Indian mahab is the team of four zebras owned by Walter Rothschild. The banker drives the beasts himself and they never fail to attract attention. All visitors to Belgium are familiar with the little carts carrying fruit, milk or vegetables, and drawn by one or more powerful-looking dogs. In former days dogs were much more used for draught purposes than they are now. A well-known character who was known as "Old Lal" used to race the coaches on the North road running out of London with a team of dogs. He constructed for himself a sort of buckboard and had harnessed to it four foxhounds, who would cover long distances at a great pace. More than one instance is on record of ostriches being used in place of saddle horses or for drawing light traps. A big ostrich known as Oliver W. may be seen any day pulling a buggy along the roads near Jacksonville, Fla. A wealthy man of Vienna named Doller once built a carriage to which he attached two bears, while a third was trained to sit beside him on the box seat. With this extraordinary turnout Doller appeared in the streets of the Austrian capital, but complaints were soon made to the police that the bears scared horses and provoked runaways. Doller was forbidden to drive his team in the city. He then started a team of trained wolves, but again the police objected to his displaying his eccentricities in the streets of Vienna, and he gave up the attempt to divert the public with strange turnouts. But the pain for eccentricity in turnouts must be given to an Englishman named Huddy, who when 97 years old traveled from Lima to Fermy in an oryster tub set on wheels and drawn by a pig, a badger, two cats, a goose and a hedgehog. He wore a red nightcap on his head and carried a whip in one hand and a tin horn in the other.

Eugene J. Hall, the poet and publisher, says that one dose of Foley's Honey and Tar restored his voice when hoarseness threatened to prevent his lecture at Central Music Hall, Chicago. Nothing else as good.

New York's Raines Law.

New York's Raines law, regulating saloons, has yielded \$61,000,000 to the state and local treasuries since its passage, five years ago. Saloons have decreased from 33,000 to 27,000, and arrests for drunkenness diminished from twelve to nine for each thousand population.—New York Times.

Never Had a Headache.

Mrs. S. T. Rorer, the famous Philadelphia teacher of cooking, has never had a headache and is the picture of health. Yet she is one of the busiest women in the United States. This is a standing argument for scientific cookery.

If troubled with rheumatism, give Chamberlain's Pain-Balm a trial. It will not cost you a cent if it does no good. One application will relieve the pain. It also cures sprains and bruises in one-third the time required by any other treatment. Cuts, burns, frostbites, quinsy, pains in the side and chest, glandular and other swellings are quickly cured by applying it. Every bottle warranted. Price, 25 and 50 cents. For sale by H. F. THE DAIRY

Dairy Notes.

The live stock census in Iowa shows the number of cows in that state to be 1,295,960. Of these 631,823 are kept for the supplying of milk to creameries. The average number of cows per square mile is a little over 23. Some of the counties with a large number of cows are the following: Winnebago, 17,809; Kossuth 19,846; Clayton, 20,850; Fayette, 22,282; Bremer, 17,671; Blackhawk, 17,897; Buchanan, 17,254; Delaware, 22,531; Dubuque, 17,544; Jones, 18,454; Linn, 20,646; Benton, 17,407; Tama, 17,028; Johnson, 17,430.

The report of the state dairy commissioner of Iowa shows that the dairy laws in that state are working well. The law forbidding the sale of colored oleomargarine seems an easy one to enforce, judging from this distance. The oleomargarine manufacturers started in to pay the legal expenses of all the suits in which their customers might become involved, but evidently concluded the contract was too big a one for them to carry out. A recent point the commissioner reports, "Late last fall this office obtained an indictment against Eli Brown of Council Bluffs, for the sale of colored oleomargarine. Mr. Brown has a United States license to sell oleomargarine, and the only point in issue was whether the stuff sold was colored. The case was submitted on a statement of the facts, and on a technicality was decided in favor of the defendant. In this action he was defended by the manufacturers of the oleomargarine sold, and, as they refused longer to stand the expense of possible trials, the sale of oleomargarine was stopped in Council Bluffs." This shows the effects of an honest attempt to enforce the laws. Though this case was lost to the state, the further sale of oleo was stopped. As soon as the violators of the laws come to understand that they will be prosecuted, they conclude that it does not pay to continue their illegal business.

Has the sale of oleomargarine reached the high water mark? The answer cannot yet be given, and will depend largely on whether or not the Grout bill becomes a law. It is interesting to note the amounts of oleomargarine manufactured during the last thirteen years, which were as follows:

Year.	Pounds.
1888	21,513,537
1889	34,325,527
1890	35,664,026
1891	44,292,409
1892	48,364,155
1893	67,224,798
1894	69,582,246
1895	56,958,105
1896	50,553,234
1897	45,591,207
1898	57,516,126
1899	87,890,000
1900	104,263,023

Attention is called to the fact that in 1894 a sort of high-water mark was reached—the amount being that year in excess of 69,000,000 pounds. During the next three years there was a steady decline in a usual product till in 1897 output was only about 45,000,000 pounds. What was the cause for this decline? It was the legislation, both state and national, that had for its object the honest sale only of oleomargarine. It took the manufacturers three years to find that they could get around or openly defy about all the laws, and then they went into the manufacture of oleomargarine more vigorously than ever. Last year the manufactured product increased 23,768,023 pounds, or 29 per cent over the preceding year. Compared with 1888 the amount last year had nearly doubled.

Negro as Indian Tribe Chief.

The Creek nation numbers 16,000, but of these no less than 6,000 are negroes. They represent the most progressive part of the tribe and are said practically to control its policy. These former slaves are so influential that a man of negro descent was chosen as one of the head chiefs of the tribe. The Choctaws, however, punish with death a marriage with a negro.

HORTICULTURE

Horticultural Observations.

We begin this week the publication of Prof. Goft's paper on the apple blossom. We do not usually devote so much space to a topic of this kind, but in this case feel that the paper lays the foundation for much future work. The principles illustrated here are applicable everywhere and should be thoroughly understood by every plant culturist. We believe that a close perusal of the paper will abundantly repay our readers.

A Wisconsin nurseryman, in some advice to nurserymen, says: "It is impossible to produce all you sell if you do a big business. There is no extensive nursery in the United States that does. We take it for granted that there are just as honest men in the business as we are, and if they propagate and cultivate in the same way and with as much care as we do, why not use their surplus goods when we are short, and they reciprocate?" That may be all right from the standpoint of the nurseryman, but is it honest? If a man buys of one nurseryman he frequently does so because he has confidence that the man of whom he buys will sell him only what he wants and he does not want stock that has passed through a number of hands before it reaches the man of whom he buys. This is doubtless at the bottom of a good deal of the dissatisfaction that is reported due to falsely named trees. To illustrate: We know a man in Illinois who ordered several hundred trees of certain varieties of an Illinois nursery. The Illinois nursery being out of those varieties, or some of them, sent to a nursery in Missouri and filled the order. The trees sent from the Missouri nursery were not the kind the man had ordered of the home nursery, but he did not find this out till years after when his trees came into bearing. He was, of course, righteously indignant and reported the facts to the Illinois nursery. At that time he, for the first time, learned that his goods had come from another nursery. The Illinois nursery offered to supply him with new trees of the varieties he had at first ordered, but to the mind of the man (and we agree with him) this was no recompense, for he had lost years of time and spent a large amount of labor on the trees palmed off on him. If a nurseryman wants to substitute the goods of another nursery for the ones ordered he should state the whole case to the buyer and leave him to accept or decline the offer. Any other course is tricky.

Fertilizers for Grain.

In the experiments of the Central Station at Wooster, Ohio, where wheat has been grown in rotation with corn, clover and timothy, the average increase per acre from plain acid phosphate, applied at the rate of 160 pounds per acre to wheat and 80 pounds per acre to corn and oats, or a total of 320 pounds during the five years of a rotation, has been 4.6 bushels of wheat, 3.6 bushels of corn, 7.2 bushels of oats and 500 pounds of hay, while from the same quantity of acid phosphate, carried partly in acid phosphate and partly in tankage, but re-enforced by the nitrogen carried in the tankage and by a small addition of muriate of potash, the average increase has been 7.2 bushels of wheat, 8 bushels of corn, 8 bushels of oats and 1600 pounds of hay.

The cost of the acid phosphate used on an acre in five years has been about \$2.40, while that of the mixture of acid phosphate, tankage and muriate of potash, has been about \$3.75; but the average increase from this mixture has been so much greater than that from acid phosphate alone as to give a total net profit, over the cost of the fertilizer, of about \$12 per acre in five years. Acid fertilizer against about \$6 per acre acid phosphate used alone.

Quality of Red Clover Seed.

The quality of a sample of clover seed depends upon its cleanness, the percentage of germinable seed, the vigor of germination, and the origin of the seed. The cleanness of a sample depends both upon its freedom from broken seeds, dirt, and other inert matter and upon the absence of weed seeds and the seeds of other cultivated plants. The seeds of timothy, white, and alsike clover are often present, and although they must be considered impurities, they can not be called injurious. Timothy may sometimes be present in such quantity as to be objectionable, not from the nature of the plant, but because the seed can be purchased at a much less cost than clover seed, and a farmer does not want to pay for clover when he gets timothy. More serious is the presence of a considerable quantity of weed seeds, especially if among the lot are the seeds of some of the more dangerous weeds.

In some localities low grades of clover seed are demanded because the clover is to be used as green manure, and it is thought that the weeds will furnish green material for plowing under and can thus do no harm. This is true to a certain extent, but the weeds fall far short of the clover as green manure, and the value of the seed will be reduced in proportion to the abundance of weeds.

INDIAN JUDGES.

Earn High Salaries by Listening to Distracting Speeches.

People in this country frequently express surprise at the high salaries paid to members of the judicial bench in India, says the London Chronicle. When, however, these gentlemen have performed to hear with a grave face such pleadings as the following it is not difficult to understand why the government offers them a handsome rate of remuneration. The case in question was one of assault and battery: "My learned friend with more wind from a teapot thinks to browbeat me from my legs. But this is mere guerrilla warfare. I stand under the shoes of my client, and I only seek to place the bone of contention clearly in your honor's eye. Your honor will be pleased enough to observe that my client is a poor widow with one postmortem son. A widow of this country, your honor will be pleased enough to observe, is not like a widow of your honor's country—is not able to eat more than one meal a day or to wear dhoties or to look after a man. So my poor client had not such physique or mind as to assault the lusty complainant. Yet she has been deprived of some of her valuable leather—the leather of her nose. My learned friend has thrown only an argument at bonum upon my teeth, that my client's witnesses are all near relations. But they are not her near relations. Their relationship is there homeopathic. So the misty arguments of my learned friend will not hold water—at least they will not hold good water. And I am sorry to say that this witness is a man of my own feathers, that there are in my profession black sheep of every description, and some of them do not speak gospel truth. Until the witness, therefore, explains how he has come across my client's nose leather he cannot be believed. He cannot be allowed to raise a castle in the air by beating upon a bush." We are glad to observe that the defendant who took a piece of the widow's valuable nose leather was bound over to keep the peace.

Clever Scheme of a Frenchman.

Some weeks ago there appeared in several of the Paris papers which circulate among the small French farmers nearest to that city a little advertisement wherein an obscure fruit dealer announced that he would give a prize of five francs for the largest apple sent him. Then fish caught at the bait, with night the advertiser had received enough of the fruit to stock his store for the season. Naturally he was glad to pay five francs for the largest of the lot, and kept all the unsuccessful specimens for sale. Besides the advertising resulted in a large increase in his business.

A GOOD COUGH MEDICINE FOR CHILDREN.

"I have no hesitancy in recommending Chamberlain's Cough Remedy," says F. P. Moran, a well known and popular baker, of Petersburg, Va. A RUNNING FIGHT.

Between Deputies and a Quartet of Alleged Criminals.
Hudson, Mich., March 12.—Four men: believed to be the crackmen who blew a safe in Toledo, got off a Lake Shore train here. Marshal Charles Atkinson and several deputies who were at the depot attempted to arrest the supposed burglars, all of whom were heavily armed. A desperate running fight ensued in which more than 100 shots were exchanged. After a long chase three of the men were captured, one being wounded.

Murdered For Money.

McRae, Ga., March 12.—The headless trunk of a man which was found in the Ocmulgee river near here is thought, according to a report from Macon, Ga., to be the remains of Edward Almy, an electrical engineer, who disappeared from Macon on Jan. 1. At the time of his disappearance he had a considerable sum of money with him. There is little doubt that the man was murdered.

Carried Off a Negro.

Haska, Tex., March 12.—The negro John Henderson, who is charged with the murder of Mrs. Younger near Corsicana, was taken off a northbound train here by eight or ten men who covered the officers with pistols. The negro was placed in a rig and driven hurriedly away, supposedly in the direction of Corsicana, which is 45 miles from here.

Want the President.

Washington, March 12.—Representative Southard of Ohio invited the president to attend the annual meeting of the Perry Monument association at Lakeside, O., some time in July. The association celebrates Perry's victory on Lake Erie. The president was unable at this time to say whether he would accept.

Town Deserted.

Roxville, Orange River Colony, March 12.—General Bruce A. Hamilton arrived here and found Roxville completely deserted. The houses were open and many of the contents were furniture. The column on its way here destroyed the grain.

Slow Collections.

Memphis, March 12.—The J. N. Falls Grocery company has made an assignment. Liabilities, \$29,000; assets, \$25,000. Slow collections due to the slump in cotton are alleged to be the cause of the assignment.

Will Back the Kenton Boys.

Kenton, O., March 12.—A number of prominent citizens, in behalf of the Kenton basketball team, challenged the Ravenswood team of Chicago, best two out of three games, for \$1,000 a side.

Fresh Cases of Plague.

Cape Town, March 12.—Twelve fresh cases of bubonic plague, including three Europeans, were officially reported Tuesday. Another death, in this case a white person, has occurred from the disease.

Railway Collision.

Berlin, March 12.—In a railroad collision near Hassenfurt, Bavaria, a passenger train was badly wrecked and eight persons were seriously injured.

DEMOCRATIC CITY PRIMARY ELECTION.

The qualified voters of the Democratic party of the city of Lima, Allen county, Ohio, are hereby notified to assemble at the places hereinafter named on March 14th, 1901, between the hours of 3 and 8 p. m., and there vote by ballot for a nominee for each of the following offices to be elected at the April election, A. D. 1901:

One candidate for Justice of the Peace.

One candidate for Water Works Trustee.

One candidate for Councilman in each of the several wards.

One candidate for Assessor in each of the several wards.

One candidate for member of School Board to serve for two years from the First, Third, Fifth and Seventh wards.

The following rules have been adopted by the City Central Committee of Lima, Ohio, for conducting said primary election:

First.—The said primary election shall be held in each of the several wards in the following places:

First ward, at north side hose house.

Second ward.—In J. L. Hartzog's

barber shop, 311 east Wayne street.

Third ward: Henry Hagenstein's bicycle shop, 133 east High street.

Fourth ward: A and C, at south side hose house.

Fifth ward: B.—Mabber's shoe shop, south Main street, south of Vine street.

Sixth ward: at Cramer's drug store.

Seventh ward: at agricultural secretary's room, court house.

Second: Said primary election shall be held on the 14th day of March, A. D. 1901, between the hours of 3 o'clock p. m. and 8 o'clock p. m., standard time.

Third: The committeeman from each ward may act as judge, or shall select a judge and clerks to assist in said election, and in case of failure or neglect on the part of such committeeman to so appoint, it shall be the duty of the chairman of the City Democratic Committee to make such appointments. Before entering upon the discharge of their duties such clerks and judges shall be duly qualified that they will correctly and faithfully conduct such election, protect it against fraud and unfairness, and carefully and truly canvass all votes cast thereat, by the rules and regulations adopted by the committee.

The oath of office shall be administered by some officer duly authorized to administer oaths. The same shall be attached to and made a part of the returns. In case of any doubt or dispute of such returns, the committee shall canvass and declare the result.

Fourth: The following shall be deemed qualified to vote at said election. (1.) All those who are known to be Democrats. (2.) All those not known to be Democrats who shall state under oath that they voted the Democratic State ticket at the preceding State election. (3.) All those who are not voters who will cast their first vote at the coming April election, who will pledge themselves to vote the entire Democratic ticket. (4.) All Democrats who are entitled to vote at the election of Members of School Board shall be entitled to vote for the nomination of such members at said primary election.

Fifth: Qualified voters shall vote at the ward in which they have legal residence.

Sixth: The judges and clerks shall keep a correct poll book for said primary election, and a separate book for the nomination of Members of School Board, in the wards in which such members are to be nominated at said primary in each of which shall be recorded the names of every person voting thereon respectively, at said election, and they shall immediately after the close proceed to count the ballots cast thereat and make correct tally sheets of the same showing the exact number of votes cast for each candidate, which tally sheets and poll books shall be signed and sealed up with the ballots cast at said election and the same shall be immediately delivered to the chairman of the Democratic City Central Committee at the assembly room of the court house, where the result shall be made known. Any candidates upon said ticket may be present at the count of said votes, either in person or by one Democratic representative whom he shall empower therefor in writing.

Seventh: The Central Committee will have sufficient number of tickets printed and delivered to the committeeman of each voting precinct. No candidate is allowed to have any tickets printed and no tickets shall be used except such as are authorized by said Central Committee.

Eighth: The candidates must pay their assessments to J. R. Fennell, the secretary, on or before 7:30 o'clock p. m., of Tuesday, March 12, A. D. 1901, or their names will not appear on the primary tickets.

The above and foregoing was adopted by the City Democratic Central Committee, of Lima, Ohio, at a meeting held March 5, 1901.

W. T. COPELAND, Chairman.
J. R. FINNELL, Secretary.

LOOKING

After the Extension of the Electric Line to Piqua.

Mr. Carpenter, the general manager of the Western Ohio Railway company, left this morning for New Bremen in the interest of the extension of the electric line from Minster to Piqua. Everything is progressing nicely, says Mr. Carpenter, and the right of way which will eventually connect Lima with Cincinnati, is gradually being secured.

Work is being rapidly pushed on the abutments for the bridges along the line from here to Wapakoneta, and the road bed will be as fine as any in the state when completed.

PETITION

Against the High Street Assessment

Will Probably be Filed This Afternoon.

The Protest of Property Holders is Being Put in Legal Form by Attorneys Leete and Brotherton.

Attorney Leete & Brotherton are engaged today in preparing a petition to enjoin the city from collecting for paving of east High street, and the instrument will likely be filed late this afternoon. The action, as most people have been informed through the reports of the council proceedings, is based upon the allowance of an excessive bill of extras demanded by the contractors, Spyker & O'Brien.

Wm. A. Baker vs. Gus. Kalb, Wm. Roberts and Wilson Thrift is the title of a petition filed yesterday which asks for damages in the sum of \$1,000. The complaint is made by the plaintiff that the rendering plant operated by the defendants near his property, has been a source of great annoyance owing to the stench which arises from the plant. Baker got a permanent injunction against H. E. Shutt & Co. when they operated, but it since passed into new hands and was started again.

IT'S SO.

People of Musical Taste Acknowledge the Only Place to Buy Pianos is Porter's.

The matter of first interest for the piano-buyer is where he can be sure of getting an instrument of undoubted good quality and where he can secure one most reasonably. There is no possible doubt about the fact that this is the safest place at which you can possibly purchase. Both as regards quality and price. Nowhere can you buy a piano to such advantage as you can from us. Here we put quality first. We sell only instruments that we know to be good, and to make secure we agree in all cases to exchange if not satisfactory. We don't sell "make-believe" cheap pianos, but we do sell thoroughly musical ones at extremely low prices, a few names of pianos now on our floor. Steck, Everett, Harvard, Fisher, Royal, Haines, Wellington and Martin. Come in and let us show you our stock.

Charles O'Harrow, a practical piano tuner is also connected with us. Do not fail to have him tune and repair your pianos.

B. S. PORTER & SON.

The Ladies Aid Society of the First U. B. church will meet at Mrs. Vannatta, 257 west North street, Thursday, the 14th for all day.

SOME

Features of Early Spring
That Teachers
And Scholars are Looking Forward to.

Interest is Already Being Taken in N. W. Ohio Oratorical Contest

And the Senior Class Will Send a Representative to Compete for Honors at Upper Sandusky in May.

According to the report made to the board of education by Supt. Miller on Monday evening teachers and scholars both have something to look forward to before the schools close for the year. Intervening between now and several interesting events, is the spring vacation which continues through the week beginning March 24.

April 5th is the day set for the Northwestern Ohio Teachers' Round Table, and Lima will have the honor of entertaining not a few of the educators from the cities included. The morning will be devoted to the visitors in calling upon the schools and in the afternoon there will be an instructive session in the Holland block, the board having decided to adjourn school for that part of the day in order to give all of the teachers a chance to attend. There will be a lecture in the evening which is pronounced a rare treat but no arrangements have been made as yet for the hall in which it will be delivered.

After considerable correspondence it has been finally decided to allow A. M. Elson, of Chicago, to make an art exhibit in Lima, to which the attention of the public has previously been called. Unless the vacant room in the Masonic temple be rented before the time set that apartment will be used for the exhibit which will include a display of 500 fine pictures. April 15 has been decided upon as the opening date and the admission has been placed at ten cents in order that everybody in the city may have a chance to attend. It is also understood that every child attending school, who is unable to buy a ticket will be taken to the exhibit, certain days being set aside for the various buildings. The proceeds are to be used for the purchase of pictures from the firm and an effort will be made to bring the paid admissions up to \$300.

An event in which the senior class of the High school is particularly interested is the oratorical contest which occurs this year on the 10th of May at Upper Sandusky. Two months yet intervene before it takes place, but the prospective contestants are even now earnestly engaged in preparing themselves for the final outcome. There will be a local contest sometime before the Sandusky event and upon that occasion the orator from the senior class will be chosen to uphold the reputation of Lima. Last year Lima was not entitled to enter the contest for the reason that was held in this city, and who knows but what there may be a silver-tongued orator among this year's seniors who will bring that honor back again?

Is No Longer Candidate for Commissioner.

This Reduces the List of Aspirants for That Position to Four—Hoffner, Getz, Arnold and Cooney.

The following letter from I. D. Crider, of German township, formally announces his withdrawal from the contest for county commissioner:

Having been thoroughly over the field with my canvass as a candidate for commissioner, I am convinced that I cannot make the nomination an account of my location and take this way to communicate to my friends that I now withdraw from the race and leave my friends free to support whoever they please. I heartily thank my many friends for their support they tendered me and the many courtesies they have shown me in my canvass.

HAD

To Move the Boys Around.
New Changes
Take Place at Official Headquarters

Owing to the Resignation of the Bowling Green Agent of the C. H. & D.

An Increase in Freight Traffic Also Results in the Promotion of Three Former Brakemen.

Proving to an increase amount of business on the C. H. & D., several new crews have had to be made up, necessitating the promotion of three brakemen to a seat in the caboose. The selections made brought promotion to George Stockham, H. W. Beedle and E. J. Shank.

An Engineering Feat.

Although twelve hours had been asked for, it required only four hours and thirty minutes to put the new draw bridge in place on the international bridge over the Niagara Sunday. The draw weighed more than three hundred tons and the task was an engineering feat that attracted much attention. The old bridge is being replaced by a new one without any interruption to traffic. When the new bridge is finished it will be possible for the Grand Trunk and Michigan Central railroads to recognize their time tables and avoid delays that always have occurred because lighter engines were used in going across the bridge. Only one span remains to be completed and the bridge will be finished in time for the opening of navigation.

Nearly Took the Bridge.

The C. H. & D. has had to contend with an artificial ditch at Milton for a number of years, each season seeing what was at first but little more than a run, broadened out into a stream fully sixty feet wide. When the spring rains and freshets begin to feed it. A few days ago several hundred people were gathered along the banks waiting to see the ice break up and come tumbling down. When the crash came the narrow gorge further up the ditch was choked, and when it let loose the rush of ice and water took several of the supports out from under the bridge which the C. H. & D. crosses. Trains had to proceed with caution, and the bridge men were sent down to make repairs as quickly as possible.

A new iron bridge is being made for the company and it will soon be ready for shipment and erection.

Preparing for the Rush.

There is a great rush in the L. E. & W. coach painting department at present, an effort being made to have all the available cars repainted by the first of April, in order to have them for the traffic to the Pan-American exposition at Buffalo, also the national G. A. R. encampment at Cleveland. Large lists of coaches are being turned out almost daily, an equally large number being received for remodeling and painting.

Looking for Offenders.

The frequent violation of the railroad's rules in South Lima, have engaged the attention of the road's detectives, who have been investigating boys riding on trains, also, the taking of coal from cars in the yards, as well as on the trains. They have been in this locality several days. Very likely some arrests will follow.

Notes.

Earl Lee, of the L. E. & W. shops was off duty yesterday on account of a gripe.

Four coaches were sent out from the L. E. & W. paint shop yesterday. Machinist Chan Wallace has resigned his position at the L. E. & W. shops to accept a similar one, with the Lima Machine Works.

W. H. Gibson, until recently agent for the C. H. & D. at Bowling Green, has resigned to accept a position in a mercantile establishment, and the replacing of him with a new man has resulted in several changes being made in the general office here.

Richard Thomas, Superintendent Ploeter's chief stenographer, has been sent to Bowling Green as agent at that point and Walter Overly, who was Assistant Superintendent Shoemaker's stenographer, has been promoted to Mr. Thomas's place. Mr. Shoemaker has been supplied with a new man, Fred Wilhelm, and the official offices are now being adjusted to these new conditions.

ROBBERY

Committed in Broad Daylight
At Home of Thomas Doyle, This Morning.

Robber Gained an Entrance Through a Window and Stole Twenty Dollars—Police Make a Capture.

This morning between the hours of 8 and 9 o'clock, the home of Thomas Doyle, at 531 north Elizabeth street, was entered by a robber who secured \$20 in money and escaped.

Mrs. Doyle was away from home at the time of the robbery, attending services at St. Rose church, and upon going home she discovered that some one had climbed into the kitchen through a window on the north side of the house and had then opened a door leading into the main portion of the building. The money was taken from a bureau drawer.

The police were notified of the robbery at 10:45 o'clock and were furnished with a description of a stranger who had been seen in the yard at the Doyle home about the time the robbery was committed. Soon after this report was received officer Neubrecht arrested a suspicious character giving the name of Harry O. Henkle, O. He answered the description well and had three pocketbooks and a ladies' silver watch in his possession, but did not have the missing \$20. Shortly before his arrest he was seen in company with another stranger whom the police have since been unable to locate.

This afternoon Sergeant Caddy arrested two tramps who had been begging money on the streets.

"I had grip three months; could not sleep; pain all over and headache very bad. Dr. Miles' Nervine, Pain Pills and Liver Pills made me well." Mrs. E. C. Bowley, Waterloo, Ind.

NATIONAL UNION.

Ottawa Council meets tonight in Klaus hall. Deputy Hunt will be present. A report will be made concerning our late friend, J. W. Bailey. A. G. Lutz, Pres.

TORREY KIRK, Sec'y.

No matter how long you have had the cough; if it hasn't already developed into consumption, Dr. Wood's Norway Pine Syrup will cure it.

THE IDLER.

Night before last Mr. and Mrs. C. Shepherd were surprised by a large party of friends, who, during their absence, took possession of their home on east High street. The event was given in honor of the tenth anniversary of their marriage and it was greatly enjoyed by all who were present.

J. W. Allison's friends in his city will be surprised to learn of his marriage to a former Lima woman and that they are now making their home in Muncie, Ind.

W. S. McNairy, who for years has been with the G. E. Bluem dry goods store, severed his connection with that house yesterday and will go tomorrow morning to Detroit, where he will enter in the employ of one of the largest fur houses in America in the capacity of traveling salesman. Mr. McNairy's years of experience in the cloak department amply qualifies him for the new line of work which he will undertake.

Coe & Westbay, of the Arcade sample room, near Central avenue, on Market, always greet you in a pleasant manner, and they handle the best wines and liquors on the market.

THIRD WARD PRECINCT.

The election of delegates will be held at the same voting place as the city primary, at Henry Hassenstein's, on east High street, Thursday, between the hours of 3 and 8 o'clock. C. J. BROTHERTON, Com.

GOOD

Men Are on All the Tickets
For Tomorrow

The Day for Democratic Primary.

Five Candidates for Nomination for the Two City Offices

Tomorrow the Democracy of the city will hold its spring primary election for the purpose of placing in nomination one candidate for the office of Justice of the Peace: one candidate for Water Works Trustee; one candidate for Member of the City Council and one candidate for Assessor in each ward, and one candidate for Member of the Board of Education from the first, third, fifth and seventh wards each.

There are two candidates, W. E. Reilly and Ben. S. Henderson, for the Justice of the Peace nomination, three for the nomination for Water Works Trustee, John Thompson, James Porter and W. B. Craig, and there are contests in the first, second and fifth wards for Councilmanic nominations. Among the candidates for Assessor there are contests in the second and fifth wards and among the candidates for nomination for Member of School Board the only contest is in the fifth ward.

Last evening the Democratic city central committee met in its last session before the primary and by placing the names of the various candidates on slips of paper, drew them from a hat and placed them on the primary ticket in the order in which they were drawn. The primary opens at 3 o'clock tomorrow afternoon and closes at 8 o'clock in the evening.

THE CITY TICKET.

There are only two city offices to be filled this spring and as all of the Democratic candidates are excellent men and citizens well qualified for the offices to which they aspire the chances for the ultimate election of the nominees are very good indeed. The primary tickets in the various wards will be headed as follows:

IN GETHSEMANI

The Remains of Catherine Scully are Laid to Rest.

The funeral services over the remains of Catherine Scully were held at St. Rose church this morning at 8:30 o'clock. Rev. James B. Mooney was the celebrant of the Requiem High Mass, and also preached a very pathetic funeral sermon, addressing many beautiful words of consolation to the bereaved family. The floral pieces were numerous and beautiful. The class mates of the deceased attended the funeral services in a body. The body was consigned to a final resting place in Gethsemani cemetery.

COMMITTEE

Of Ten Took Their Departure for Columbus Today

And Will Look Over the Ground Before the Meeting With the State Board Tomorrow.

The committee of ten, who will make a formal protest against the increased property valuation in Lima, left this morning for Columbus, a day in advance of the delegation which expects to go on the special train tomorrow. Thursday was the day set aside by the state board of equalization for the presentation of Lima's complaint, but the committee wanted to be on the ground floor in order to get things well in hand.

There were several members of the special committee unable to go at this time and their places were filled by Judge Richie, Judge Price, Mayor McComb and George Hall.

On Friday the state board goes to Toledo for an all day's session.

A PROMINENT LADY

Speaks in Highest Terms of Peruna as a Catarrh Cure.

Mrs. M. A. Theatre, member Rebecca Lodge, Iola Lodge; also member of Woman's Relief Corps, writes the following letter from 1288 Jackson street, Minneapolis, Minn.:

Mrs. M. A. Theatre, Minneapolis, Minn.

Peruna Medicine Co., Columbus, O.

Gentlemen:—"As a remedy for catarrh I can cheerfully recommend Peruna. I have been troubled with chronic catarrh for over six years. I had tried several remedies without relief. A doctor friend advised me to try Peruna, and I began to use it faithfully before each meal. Since then I have always kept it in the house. I am now in better health than I have been in over twenty years, and I feel sure my catarrh is permanently cured."

Peruna cures catarrh wherever located. As soon as Peruna removes systemic catarrh the digestion becomes good, nerves strong, and trouble vanishes. Peruna strengthens weak nerves, not by temporarily stimulating them, but by removing the cause of weak nerves—systemic catarrh. This is the only cure that lasts. Remove the cause; nature will do the rest. Peruna removes the cause. Address The Peruna Medicine Company, Columbus, Ohio, for a book treating of catarrh in its different phases and stages, also a book entitled "Health and Beauty," written especially for women.

FEAR OF WILD ANIMALS.

Wolves, Bears and Panthers Do Not Seek for Man.

Of questions asked by those who have never been much out of doors, none seems so simple to the old timers as that which concerns the dangers to which the camper may be exposed from the attacks of wild beasts. It is chiefly women and children who ask such question, but it is evident that in the brains of many inexperienced persons is firmly established a belief that wild animals are dangerous—that wolves, panthers and bears prowling about, seeking whom they may devour. This feeling, already existing, is encouraging and strengthened by a certain amount of the writing of the day. The average man and woman love to read a bear or panther or wolf story not less than do small boys and round-eyed children listen with pleasure to the tales of some venerable uncle or grandfather, who relates the story of the wolves that used to howl about his cabin or visit his sheep fold when first he settled in the country. In this land of America, as many know, there are no such things as dangerous animals, though there are creatures which may be made dangerous. The wolf, the bear and the cougar are far more anxious to get away from man than man is to get away from them. If given the opportunity they will always slip away and run, and if they fight it is because they believe that they have been cut off from every avenue of escape. Where an animal has been wounded it is a different matter. Then, often, considerations of prudence are forgotten and the animal acts on impulse, instead of doing what it knows to be wise; but even so there is much more danger from a wounded panther, and vastly more from a wounded moose. But for the average man who is traveling through a new country where wild animals may be plenty, who stops when he has made a day's march and is at home where night finds him, there is not now, nor ever was, more danger from the wild animals of the country than from the lightning which blazes in the summer sky. Many more people have been killed by lightning than have been run over by stampeding buffalo herds, or killed by unwounded grizzly bears, or by all the other animals of the prairie, put together. One might almost say that more people have been struck by falling meteorites than have been killed by panthers or wolves. And yet from day to day the newspapers continue to print bear stories, catamount stories and wolf stories, and probably they will do so until long after the last bear, catamount and wolf shall have disappeared from the land.

CAMPFIRE SKETCHES.

SOME SHORT STORIES FOR THE VETERANS.

Project to Erect a Monument to Confederate Women Is Well Under Way at Chattanooga, Tenn.—How General Sherman Was Obedient.

A Dirge.

Room for a soldier! Lay him in the clover;
He loved the fields, and they shall be his cover;
Make his mound with hers who called him once her lover;
Where the rain may rain upon it,
Where the sun may shine upon it,
Where the lamb hath lain upon it,
And the bee will dine upon it.

Bear him to no dismal tombs under city churches;
Take him to the fragrant fields, by the silver birches,
Where the whip-poor-will will mourn,
Where the oriole perches;
Make his mound with sunshine on it,
Where the bee will dine upon it,
Where the lamb hath lain upon it,
And the rain will rain upon it.

Busy as the busy bee, his rest should be the clover;
Gentle as the lamb was he, and the fern should be his cover;
Fern and rosemary shall grow my soldier's pillow over;
Where the rain may rain upon it,
Where the sun may shine upon it,
Where the lamb hath lain upon it,
And the bee will dine upon it.

Sunshine in his heart, the rain would come full often
Out of those tender eyes which over more did soften;
He never could look cold till we saw him in his coffin.

Make his mound with sunshine on it,
Where the wind may sigh upon it,
Where the moon may stream upon it,
And memory shall dream upon it.

"Captain," or "Colonel"—whatever invocation
Suit our hymn the best, no matter for thy station—
On thy grave the rain shall fall from the eyes of a mighty nation!

Long as the sun doth shine upon it,
Shall grow the goodly pine upon it,
Long as the stars do gleam upon it,
Shall memory come to dream upon it,
Shall memory come to dream upon it.

Monument to Confederate Women.

Col. Garnett Andrews, of this city, prominent as a member of the United Confederate Veterans, and well known throughout the south as one of the foremost lawyers of this section, says a Chattanooga (Tenn.) dispatch to the St. Louis Globe-Democrat, is at work on the details of the plan which he will present to the next encampment of the United Confederate Veterans, looking toward the erection of the most costly monument in the United States to commemorate the valor and fidelity of the Confederate women. The agitation among Confederate veterans to build a great monument to the Confederate women had its beginning here on Decoration day two years ago, when Col. Andrews, the orator of the occasion, made it the theme of his address. Afterwards N. B. Forrest Camp (local) and the general convention at Louisville of United Confederate Veterans approved the undertaking, but no plan of action was adopted. A reporter called on Col. Andrews and requested his views as to the progress of the work, the necessity for it, plans of organization and style of monument. "It is to the discredit of our people," said Col. Andrews, "that no more progress has been made, although I believe that such a response would come in dollars and cents to a canvass for funds as was never witnessed before. What has been done to give even faint expression of honor to this matchless race of women? If I were to die now my gravestone would blush with shame at the answer, 'Nothing, nothing.' Yet they still keep on building memorials to the Confederate dead. And we, the surviving veterans, keep unbroken our record of disgrace. After all they have done, after their love, suffering and devotion, after their beautiful fame, we find not a stone to their memory in all the south. My idea of what should be done can be told in a few words. Collect at least \$500,000 or more—I believe it can be had—no man would refuse for an object so sacred and popular. With it build one monument—not several inferior ones—but one, so grand in size, rich in material, artistic in design and execution and faultless in location, that the world would applaud and thousands would come to revere the memory of so great a womanhood. I believe in a single working machinery, with few officers, for expeditious accomplishment. An executive head of one to three, the fewer the better, should be provided, with power to appoint sub-officers and canvassers. Allow them reasonable compensation; otherwise they cannot afford to devote themselves to the work. Get speakers here and there, canvass every county in the south, and in my judgment, the \$500,000 would be in the bank within a year." Col. Andrews stated that he would prefer to leave the matter of location of the monument to the United Confederate Veterans, and that he had no suggestion to make in that respect.

Windfall for Lincoln's Poor.

The Nebraska Fish and Game Protective association seized the other day in Lincoln ten boxes of quail, each containing three dozen birds, which were being shipped to Seattle, Wash. The penalties for having the birds out of season would amount to \$1,800. The birds were distributed among poor residents of Lincoln.

Senator's Disease S. Illness.

Filipinos pay as soldiers in the United States army was the topic of a recent afternoon in the senate, and the discussion developed a number of sharp remarks and replies. For once, Senator Tillman, who usually attempts to take exception, interrupted to add force to the speaker's argument, and the man who had the floor was his old target. Senator Spooner of Wisconsin, who warmly insisted that if Filipinos were accepted as soldiers of the United States army they should have the usual pay, "Filipinos," he said, "who fight for the American flag and against their fellow citizens who choose to show it no respect should get the same wage as the American who fights by his side." Gutting leave to interrupt, after several attempts, Senator Tillman said: "I wish to strengthen the senator's position by asking those who favor paying the Filipino soldier in our army half-pay if they would carry that practice to its logical completion by granting the Filipino half pensions." Senator Hale said the danger of death from disease was five times as great to the American soldier in the Philippines as it would be to the Filipino regular. "Then the man who goes into battle," said Senator Spooner, concluding the debate on the point, "and takes his life in his hands ought not to receive as much for it as the other man who goes into battle and takes his life in his hands under the same flag, because one is acclimated and the other is not."

Robotic for Ignorance.

In a certain skirmish a colonel (general he came to call himself) got a slight scratch on his leg. The wound was a matter of great glory to him, and he nursed it through after days, growing lazier with every year, that the memory of his bravery might ever be near him. One day, late in his life, as he sat nursing his leg and pondering the glorious past, a young man, visiting the family for the first time, approached and sympathetically remarked:

"Lame, General?"

"Yes, sir," after a pause and with inexpressible solemnity, "I am lame."

"Been riding, sir?"

"No," with rebuking sternness, "I have not been riding."

"Ah, slipped on the ice, General?"

"No, sir," with actual ferocity.

"Perhaps, then, you have sprained your ankle, sir?"

With a painful slowness the old man lifted his pet leg in both hands, set it carefully on the floor, rose slowly from his chair, and, looking down upon the unfortunate youth, burst forth in the sublimity of rage:

"Go read the history of your country, you puppy!"—Chicago Inter-Ocean.

INSIST

On a Substantial Reduction in Our Excessive Valuation.

Small Rebate is Not Enough

When it Only Contemplates the Removal of the Valuation Added by the State Board. A Vigorous Demand Should be Made for More.

The committee which will go to Columbus tomorrow to confer with the State Board of Equalization upon the subject of reducing the valuation of Lima's real estate should not be satisfied with a mere reconsideration of the action of the Board imposing the increase of ten per cent. upon our valuations.

THEY SHOULD INSIST ON A SUBSTANTIAL REDUCTION FROM THE VALUATIONS AS RETURNED BY THE LOCAL BOARD OF EQUALIZATION, WHICH WAS FOR MORE THAN THE AVERAGE VALUATION IN CITIES OF THIS SIZE THROUGHOUT THE STATE.

The valuations imposed by the land appraisers was high enough, but the county Board of Equalization added materially to this valuation, thereby putting the taxpayers of Lima in a position to pay a greater percentage of the State taxes than other cities of similar size, and with the same material values.

Other cities in the state, whose values have not been increased by the state Board, have met with abundant success in their effort to have the valuation reduced below that returned by the local board, and there is no reason why a vigorous attempt should not be made by the Lima committee to obtain an equal advantage for Lima. Neither is there any reason why the suggestion made by the Columbus gentlemen to the advance committee that we should only ask for a reduction in the amount of the State Board's increase, should be heeded by the Lima committee. It is certain that if they do not ask for what they want they will not get it, and it is also further probable that if the committee insists upon it they can not only have the increase remitted but have a substantial reduction made in the valuation as returned by the local board. A reduction of that character was secured ten years ago and can be obtained now if the proper effort is made.

OIL

From the Big Texas Steer

Flows a Mile

And is Hoisted Into Tank Cars

By the Mysterious Unseen Force That Has Made It Famous.

A Heavy Gusher is Reported From the Weston, West Virginia Field. More Buckeye Men Come to Lima.

The first oil was shipped from the J. M. Guffey Co. gusher near Beaumont, Texas, last Wednesday. Ten tank cars were loaded direct from the well; the pressure at the well was of sufficient force to carry the oil a mile through the pipe line, and at the terminus to lift it to the level of the tank cars. This performance removes all doubt, if any existed, as to the impairing the pressure at the well when it was shut in some weeks ago to stop the flow of oil on the ground.

J. M. Guffey & Co. have drilled their No. 2, a half mile north of No. 1, as deep as they will go with the six inch casing. This company is making good progress at its No. 3. It is not intended, however, to drill in any new wells at present. Mr. Guffey stated that the production of the old gusher when opened up would keep them busy to take care of it for a time at least, and they were not looking for more trouble by drilling new gushers. It is expected that the pipe line will have been completed to Port Arthur by the last of next week. There are ten or twelve wells drilling in that part of Jefferson county.

Bills have been introduced in the Texas legislature intending to regulate the oil industry by prohibiting operating from "bores" for oil until they have erected iron or wooden tankage at the location where they desire to drill. The record of the Corsicana (Tex.) field from its inception up to the close of January this year, shows that nearly 52 per cent. of the

1,040 wells completed failed to produce oil.

Salmagundi. It was thought for some time that the gusher period in the Crows run development, Beaver county, was over, but the McElhane Oil Company is not ready to quit, says the Pittsburgh Commercial-Gazette. When it drilled its No. 5, on the James McElhane farm deeper, the well increased its production to 25 barrels an hour, and will temporarily boost the production of the pool above 2,000 barrels a day.

Twenty-seven employees of the Buckeye Pipe Line company left yesterday for Lima, where they will be assigned work in the Allen county field.—Toledo Blade.

A West Virginia Gusher. A dispatch from Weston, W. Va., says:

"About daybreak yesterday in the Fink field the South Penn met with a surprise in their Condry No. 1. In the Big Injun in this field there is a small showing of oil, and there were endeavoring to ease through this sand with their eight-inch hole before setting in the first inch casing, when they struck a flow of oil that was unmanageable all day yesterday. A full stream from this large hole went 50 feet above the rigging. The well today made 13 flows of from 20 to 30 minutes' duration. It will be connected up to tanks tonight."

Beans Came Down in Showers

On Mr. Shook

When He Addressed the Laundrymen,

Endorsing Mr. Motter's Invitation Extended on Behalf of Lima.

The Beans Won the Day and the Next Annual Meeting Will be Held Here—Chinese Question Discussed.

The Ohio Laundrymen's association in convention at the Chittenden hotel discussed the Chinese question this morning, so far as it applies to the "Heathen Chinese doin' washes," says the Columbus Press-Post, of last evening. The matter was discussed at last evening's session, informally. The committee on resolutions made its report this morning; then it was that hard things were said about the celestials.

Lima was chosen as the place for the next annual meeting. Mr. I. S. Motter and E. W. Mosier spoke in behalf of that town and when Mr. Nelson Shook got up to endorse what Mr. Motter had said, he was showered with Lima beans by the delegates. Then the convention was awarded to Lima.

The election of officers resulted: President, S. B. Waters, Cincinnati; first vice president, J. E. Mercer, Columbus; second vice president, Edward Waters, Zanesville; secretary, J. W. Crothers, Cincinnati; treasurer, Carroll Thornton, Youngstown.

Executive Committee—F. W. Stevenson, Cincinnati; E. B. Kelley, Dayton; and H. H. Zigler, Columbus. These men also composed the legislative committee.

Affiliating Committee—Nelson Shook, Lima; N. Freese, Cincinnati; Carroll Thornton, Youngstown.

The convention closed with a banquet at Schenck's hall in the afternoon.

Parties wanting a loan or to renew their old loan at the very lowest rate, will make money by calling on C. H. Folson. 27-6t

The meeting of the Franklin club will be postponed two weeks on account of sickness.

HOTLY CONTESTED.

Basket Ball Game Between Players Last Night.

City Championship Won by the Business Men's Strong Team of the Y. M. C. A.

One of the best games ever seen here was that played last night, between Lima High School and the business men.

For one half it looked like a High School victory, but they did not have the endurance and lost the game in the last fifteen minutes, when the business men outscored them, 14 to 2.

A large and enthusiastic crowd of spectators was present and cheered their favorite team whenever there was anything to cheer at.

The features of the game were the passing of the High School team, the goal throwing of A. Thomas, and a one-handed throw by Dr. Jones. The score is as follows:
